**Subject:** RE: AP INQUIRY: Houston ITC fire-water contamination question on deadline  
**Date:** Wednesday, March 20, 2019 1:01:35 PM

---

Here is draft response. Please edit as you see fit:

**ITC has said it's finding petrochemicals from the fire in the water at Houston's Ship Channel. Can you please advise soonest what EPA is going on that \_ is it aware, what kind of chemicals, is it a public health threat, is it testing or does it have test results?**

Foam and product from fire-fighting operations has been found in runoff and has been observed in the Ship Channel. ITC is applying boom. TCEQ, ITC and EPA are taking water samples and monitoring the air. There are no results at this time.
